DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keizo (JP 63-236340).

With respect to claim 4, Keizo discloses deviation between the reference and the first image and the deviation between the reference and the second image, (see constitution in the English translation as provided by the applicant). However, he fails to disclose the based upon the first and the second image, as claimed. But, as describe in the English translation of the constitution the system positioned the pattern on a chip using the images obtained by the two cameras, therefore, it would have been obvious to one ordinary skilled in the art at the time of invention can simply use the images provided by the cameras 1 and 2 and align the apparatus, to improve the accuracy of the position detection system.

With respect to claim 5 and 6, the cameras are taking images that are low and high magnification images and that the images are use to find the deviation, (see constitution in the English translation as provided by the applicant) as claimed.

Art Unit: 2623

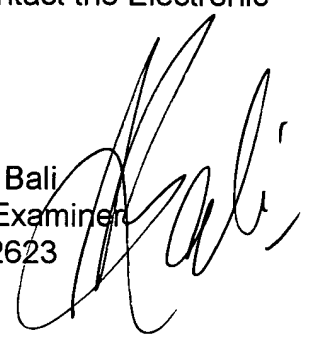

Claims 1-3 are rejected for the same reasons as set forth in the rejection of claims 4-6, because claims 1-3 are claims an apparatus for the method claimed in the claims 4-6.
